PREPARATION OF FIRE SEASON

WILDFIRE IS COMING. ARE YOU READY?

The geography, weather patterns and number of Wildland Urban Interface communities in California make it a state particularly threatened by devastating wildfire. To help educate property owners and residents in areas most at risk, CAL FIRE has developed a communications program called "Ready, Set, Go!" that breaks down the actions needed to be ready for wildfire.

Get prepared for wildfire before it strikes by following Ready, Set, Go!

Be Ready: Create and maintain defensible space and harden your home against flying embers.

Get Set: Prepare your family and home ahead of time for the possibility of having to evacuate.

Be Ready to GO!: Take the evacuation steps necessary to give your family and home the best chance of surviving a wildfire.

HYDRANT FLUSHING PROGRAM

Hydrants are necessary to flush the underground water system, improving water quality by removing mineral and sediment deposits that accumulate over time. While not harmful to customers, the substances can cause aesthetic water quality issues when they are not periodically flushed from the system. The process is known as hydrant flushing, and it is an essential maintenance procedure all water providers must perform periodically to ensure the delivery of water that meets state and federal drinking water standards. Hydrant Flushing was conducted and completed last month, we would like to thank our customers for their patience during this important process.
